Thank you for attending our recent science trip. It was a thrilling day with lots of exciting hand-on experiences. Whilst on the trip we learnt about the ExoMars Rover which is planned to launch in 2020.

To deepen this new knowledge even further we would like to challenge you even further.

## Challenge Task – due Friday 7<sup>th</sup> June

Produce a research project on the ExoMars Rover. This can be produced however you feel best. Some ideas might be:

- A poster
- A written report
- A powerpoint
- A model

The project could include key information about the ExoMars describing what it is, where it's going and perhaps the history behind previous launches.

Please return your projects to Miss Howard by the Friday 7<sup>th</sup> June. Then together with Mrs Lavelle-Murphy we will pick 3 winners.

Kind Regards

Miss Howard
